TECHNICAL PROJECTS

Adventures of Mr. Meowgi | **Lead Developer** | [Project](#) | May/2023
Spearheaded a team of 3 to stretch out of our coding comfort zone and created a survival game using Phaser Js.

- Deepen the roots of creating class objects to structure a game that housed integrous data.
- Counseled the team through the woes of debugging and roadblocks of learning a new technology while also maintaining production of a MVP.

ShareJams | **Lead Developer** | [Project](#) | April/2023
Initialized a weekend project to solve an blind spot in the application of spotify.

- Ciphered a plan of action and developed a product to virtually sync your playlist with a counterpart with great musical taste so you don't have to tediously share songs on the fly.

Grace Shopper Project | **Developer** | [Deployed Project](#)| April/2023
A simple project emulating the skills of working in a git org.

- Displays a Stateless app through a mock eCommerce site.
- Delivered a foundational database schema to house integrous data .

EXPERIENCE

Branch Lead | **Advance-Professional** | Chicago, IL | August/2020 - January/2023
- Spearheaded a turn around in operations of a poorly performing multi-million-dollar pilot delivery service in the North Chicago and O'Hare Airport adjacent neighborhood.
- Instituted a new training program for drivers and warehouse personnel, developing a vacuum of quick client satisfaction and resulted in sales increase from 260k to 988k a year.
- Collaborated with IT to increase the presence of tech to capture new metrics to advance the growth of sales and customer engagement by 20%.
